CAREER OBJECTIVE

Aspiring Full Stack Developer with knowledge of React.js, Django, and PostgreSQL, seeking an opportunity to develop and deploy scalable web applications. Passionate about creating user-friendly solutions and contributing to impactful projects.

EDUCATIONAL QUALIFICATION

Bachelor of Engineering - Computer Science and Engineering, 09/2023 – Present
Rathinam Technical Campus, Coimbatore
Coimbatore, India
CGPA: 8.47

Higher Secondary Education, Model School, Namakkal, Tamil Nadu 2022 – 2023
Percentage: 87 Namakkal, India

TECHNICAL SKILLS

- **Programming Languages:** Java
- **Tools & Practices:** Git, GitHub, VS Code, IntelliJ IDEA
- **DataBase:** PostgreSQL
- **Frontend Development:** HTML, CSS, JavaScript, React.js
- **Backend Development:** Django
- **Data Analysis & Visualization:** Microsoft Excel, Power BI

PROJECTS

Local Problem Solver (Hyperlocal Civic Issue Reporting Platform),

Tech Stack: React.js, Django, PostgreSQL, Google Maps API.

- Developed a full-stack web application that enables users to report and track local civic issues such as garbage, water leakage, and road damage using real-time location and image uploads. Implemented a voting- based prioritization system to highlight critical issues and an admin dashboard to monitor and update resolution status.

E-Commerce Application for Electronic Items,

Tech Stack: HTML, CSS, JavaScript, React.js, Django, PostgreSQL, REST APIs.

- Developed a full-stack e-commerce web application for purchasing electronic products online. The application enables users to browse products, filter items by category, add products to a shopping cart, and manage orders efficiently. Implemented RESTful APIs to handle product data, user interactions, and order processing. PostgreSQL was used to store and manage product details, user information, and order records efficiently.

Customer Shopping Behavior,

- Performed data analysis on customer shopping behaviour to identify purchasing patterns and trends. Used data cleaning, filtering, and visualization techniques to analyze customer preferences and spending habits. Generated insights using analytical tools to support better business decision-making. The project focused on understanding customer segmentation and improving sales strategies through data-driven insights.

CERTIFICATIONS

- **Great Learning Certificate -** Front End Development – HTML,CSS
- **Certificate -** UI/UX Designing Work Shop
- **HackerRank Certificate -** SQL

SOFT SKILLS

- Time Management
- Adaptability
- TeamWork
